

## CONTENT

1. Preface .....	3
2. Subject and tasks analysis of medicinal and narcotic substances.....	6
3. Classification of medicinal products .....	13
4. Overall classification of medicinal products.....	15
5. Systems without dispersion medium.....	23
6. Systems with the liquid dispersion medium.....	23
7. The chemical action of medicinal substances and their mechanism of action.....	26
8. Dosage and concentration of medicinal substances .....	36
9. Medicinal substances of inorganic origin .....	46
10. Medicinal substances of organic origin.....	62
11. Excipients in medicines and their classification ....	69
12. Biologically active additives .....	76
13. Medicines of vegetable origin .....	90
14. Classification of narcotic drugs and psychotropic substances. Features of their action on the body.....	99
15. Variety of drugs and their characteristics.....	109
16. Qualitative and quantitative determination of narcotic substances.....	120

17. Determination of specific indicators in the analysis of drugs and narcotic substances.....	128
18. Physicochemical methods of detection of narcotic substances.....	136
19. Various types of drug detection tests .....	146
20. References .....	156
